

An URGENT Notice to All Small Business Owners and CEOs In Northern VA and DC:

DON'T BE A SITTING DUCK FOR CYBERCRIMINALS!

If your business is the victim of a cybercrime attack where client or patient data is compromised, you stand to lose a LOT more than you might think.

According to VA laws, you will be required to tell your clients and/or patients that YOU exposed them to cybercriminals. You will then be investigated and questioned about what you did to prevent this from happening – and if the answer is not adequate, you can be found liable, facing serious fines and lawsuits EVEN IF you trusted an outsourced IT support company to protect you.

Your competition will have a heyday over this. Clients will be IRATE and leave in droves. Morale will TANK and employees will BLAME YOU. Your bank is NOT required to replace funds stolen due to cybercrime (go ask them), and unless you have a very specific type of insurance policy, any financial losses will be denied coverage.

Please do NOT underestimate the importance and likelihood of these threats. It is NOT safe to assume your IT company (or guy) is doing everything they should be doing to protect you; in fact, there is a high probability they are NOT, which we can demonstrate with your permission.

Our FREE, Confidential Cyber Security Assessment will reveal if you are a “sitting duck” for cybercriminals, or if you could recover quickly and without incident. Get the facts! Go to this URL to claim your free assessment today: www.secured-cyber.com
